Abstract- In homeopathic medicine, there exist components of pharmacists that shape and conform groups of integral mono-pharmacists [1], whose specialized actions at quantum level are the recovery and strengthening of the will, of its organizational power and of its power regenerating of every organic system, like a factor lost in the mind-body to reach its total healthy state and endow organism to provide the body its power achieving anticipative their immunization and cure. Realizing some quantum medicine actions and its combination through integral mono-pharmacists belonging to some D_{12} -groups, it is possible to obtain this recovery and strengthening process of the mind on the body, spilling quantum intelligence codes [2], through the programming of path integrals on the vital field, of all and every part of the human body helping it to recover its electronic organic memory. Due to the nature of these actions, these same methods can be induced for the treatment of symptoms of mental illnesses.

Keywords- Integral Mono-pharmacist; Path Integrals; Quantum Intelligence Codes; Restoring Action; Vital Field

I. INTRODUCTION

The relation between mind and matter is realized through a quantum jump and only succeeded to this level. In the quantum mechanics, all the particles like package of energy and works like points of transformation (states defined by energy densities).

The vital field in the matter of an organ of \mathbf{B} is evidenced like answer between these energy states, as it is explain in the *Feynman diagrams*. Due to that existing duality between wave and particle, a duality also exist between field and matter in the nature sense. Both dualities are isomorphic in the sense of interchange of answers of interaction of a field. The states of the mind have energy densities that respond to the state changes of others [3]. There is one of the central ideas of the integral medicine.

"The integral medicine applies treatments of quantum medications that produce quantum transformations appropriate to establish an answer of the states of energy of the Part \mathbf{B} , to cure establishing an image of the field $X(\mathbf{B})$, adapted in same resonance, vitality and bio-rhythm of the healthy points of the whole body B . This last for the synergic principle of the actions of the field (Postulate 3, in [3]), and due to the metabolic program that has the body with tendency to an auto-regeneration."

A deviation on the lines of the vital field consists in an inadequate re-interpretation of the body to assimilate in some conditions that it is given into ambit or their proper fragile condition of the body to assimilate the correct information of the nutrients and signals of the vital process to cellular developments. Likewise, if we consider the deviation from the Table I, in the last arrow, as $x(s) = x(s) - x_c(s)$, where $x(s)$, is the new information that constantly is received for the body in their interaction with the life, and $x_c(s)$, is the classic information learned by the body (*not correct necessarily*, (here is where begin a suffering)), along with their life treating adequate to a situation not necessarily correct to the organism, it is necessary to apply the corrective actions so that the body returns their original healthy state, recovering its energy. In this point, when the illness appears, the body learns habit and forgets their correct state. Then the integral mono-pharmacists help body to recover their electronic memory from the best basic level, which is the atomic level [3].

TABLE I RELATIONS BETWEEN ACTIONS (CORRECTIVE AND RESTORING), REPRESENTATIVE INTEGRAL MEDICINE GROUP, STRINGS, REFLECTIONS AND FIELD OF ELECTROMAGNETIC RADIATION TABLE CONSIDERED TO THE MONO-PHARMACIST [1]

Reflection	Valences	Diagram of Strings	Field of Electromagnetic Radiation	Restoration	Representative Group of Integral Medicine	Mono-Pharmacists
	2		<p>Two effects [15]</p>	Establish covalent links to the nice joints	Pulsatilla	Pulsani
$\Im(\theta x(t)) = \sigma_a(\mathbf{B})$	<p>Covalent Links</p>	1-lines $\int \Im(x(s)) d_s$ by(3)	$D^+ \oplus D^- = \{e^{i\theta \mathbf{a} \cdot \mathbf{a}}\}$	$\Im(Id)$	D_{12}	\mathcal{G}

II. D_{12} -GROUPS OF MONO-PHARMACISTS WITH ACTIONS IN THE SOMA

In the last years, by the research of pharmacists of integral medicine that treat the affections and mental symptoms [1], there have developed formulas of integral

mono-pharmacists, and of certain synthesis of organic metals [4], that collaborate to the stability mind/body through the treatment of the somas and the elimination of the production of certain substances on the part of the human body, which derive like secondary products of the free radicals called by the *theory of the soma* [5], “miasmas”.

Such actions of stability mind/body are carried out by the strengthening of the psyche of the patient through the strengthening of their will filling with objectivity of its conscience to make her healthy. These pharmacists are represented by *Gelsem* and *Ignamara* principally. They produced a major effect that the basic patents of versions of medicines created in 1997 [6], [7], and they have a major biotechnical depth rather than medicines created in not integral laboratories of some big pharmaceutical laboratories. An easy way to comply with the journal paper formatting requirements is to use this document as a template and simply type your text into it.

In integral medicine, the somas are re-interpreted like altered states of the psycho that provokes changes of temperatures due to *topological knots* [3], that are created in the nervous system and that are a reflex of the soma degraded by the absence of a suitable balance of exchange of temperature with the media. Such is the case for example, illnesses associated with the respiratory system. In this case, the treatments of integral medicine must be realized under a combination of quantum factors that establish the correction and restoration of the thermodynamic exchange [8]. Such is the case of the homeopathic patent [9], to compose for treatment of colds and associated symptoms. In this treatment, the homoeopathically designed composition comprising zinc and dilute amounts of *Allium cepa* and *Aconite napellus* for the alleviation of symptoms of a cold is provided. The composition may further comprise *Antimonium crudum*, *Bryonia alba* and *Gelsemium*. This is a new formula with more actives given by combination factors, where the additional factor is *Gelsesium*.

Diverse allergies also are eliminated using quantum factors like the *Gelsesium*, such is the case, for example, some versions as the composition comprising effective amounts of *Thussilago petasites* (*butterbur*) and dilute amounts of *Ambrosia artemisiifolia* [9]. According to various aspects, the present invention may further comprise combinations of *Allium cepa*, *Echineacea angustifolia*, *Euphrasia officinalis* (*eyebright*), *Pulsatilla nigricans*, *Pothos foetidus*, *Ignatia amara* (St Ignatius' bean), and *Thuja occidentalis* (*Tree of Life*) to synergistically and additionally alleviate the symptoms of an concomitant allergy since that appears through the ingestion of certain food or interaction with the media. In the case of the homeopathic, components *Ignatia* and *pulsatilla* that conform the group D₁₂ of integral mono-pharmacists [7]. Their actions are the recuperation and strengthening of the will as a factor lost in the somatic code of the body (see Table II).

TABLE II SOME RESOLVING D₁₂-MONOPHARMACISTS MORE IMPORTANT [1]-[7]

#	D ₁₂ -Monopharmacists		
	Mono-Pharmacists	Organic System	Action
1	Gelsem	Psychological and Nervous System	Correction
2	Bervul	Digestive System	Correction
3	Colocuc	Skeletal and Muscle Systems	Correction
4	Bryal	Immunological System	Restoration
5	Histol	Electrical Charge System	Restoration
6	Pulsani	Psychological and Nervous System	Correction
7	Bellatrop	Micro-Control or Cellular Micro-Circuits	Modulator

In all these sufferings, the constant factor is the part of the nervous system affected by the psychological factor. Their effectiveness of the mono-pharmacist, is their capacity to invest little energy ($= \text{Joules} \times 10^{-34}$) to realize a deep action (see Fig. 1).

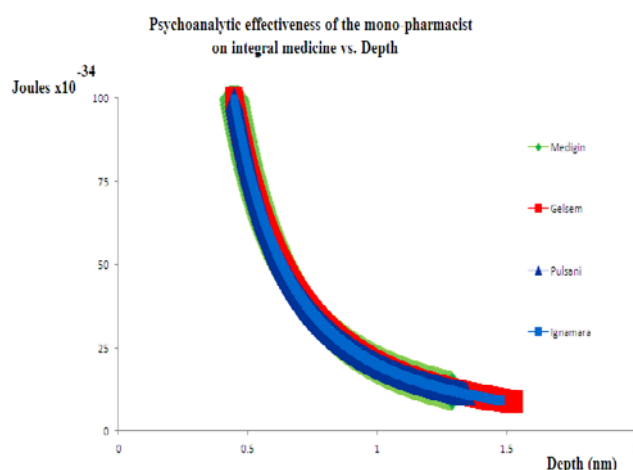

Fig. 1 The psychoanalytic effectiveness of the mono-pharmacist on integral medicine versus depth (This energy was calculated with the following experimental equation $M = R^a E^l$, from the quantum integral transform studied in [3])

$$x(t) = \text{correction} + \text{restoring} = \int_{x(C)} O_c(s) w(s, t) dt = \dim \Lambda(\alpha) \left\{ \frac{1}{A} \prod_{j=1}^{\infty} \left(\int_{-\infty}^{\infty} \phi(n_j) F(n_j) dx(t) \right) \right\},$$

Considering the minimum energy of each mono-pharmacist, which is according to it predicted by the Theorem 1, from [1] (The formula is a short manner of the integral transform where R^a , is *dim*), and E^l , this is what is between brackets)

In some cases, the mono-pharmacists for the nervous system must realize energy displacements to recover the force of the field in its holistic shape [1]. Such is the case of mono-pharmacist *Pulsani*, whose action of displacement turns out to be reflected in the strengthening of the will of the patient to be treated duplicating the auto-cure factor of *B*. Also combining it with other quantum mono-pharmacists, it can realize tasks of psychological healing (see Fig. 2).

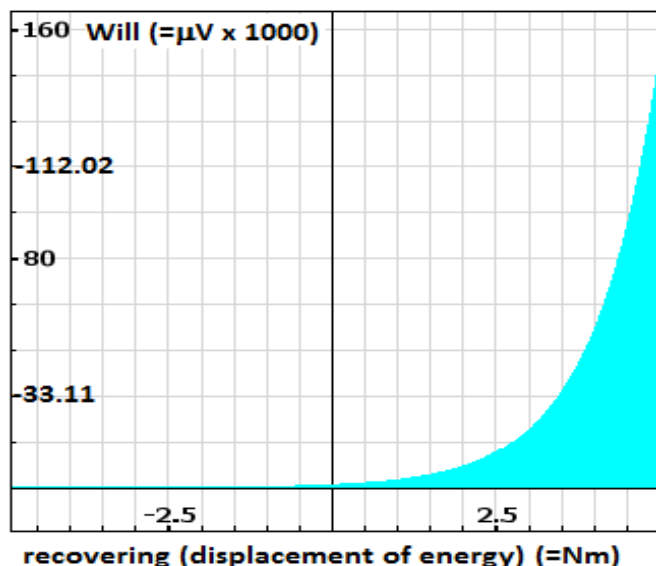

Fig. 2 By the properties $recognize + displacement = \phi(1)\delta(0 - 1) + (1)u(0)$, with an evolution change given by $\exp(tX)$, we have the curve of recovering of the will. This graph corresponds to the action of *Pulsani*, the continuous strengthen of the will

III. D_{12} -GROUPS OF MONO-PHARMACISTS WITH ACTIONS IN DIGESTIVE SYSTEM

From the analysis realized in the Theorem 1 (*F. Bulnes*), and as a direct consequence of the postulate of *mind/body* given in [2], we have conjecture (*F. Bulnes*, and *F. H. Bulnes, Sr*) that all illness or sufferings of the organic system begins in the digestive system which is the first to be directly affected by the mind.

The digestive system is one of the most sensitive parts of the organism, which receives straight the affective signs of the concomitant psyche on the nutrients that provide with energy the body [8]. In the deepest level, the food in itself takes codes of quantum intelligence [1] that collaborates to the electronic memory of the organs of the digestive system to realize its digestive functions. Then its interaction is realized straight between the psychological and material part of the organism.

On the other hand, the fundamental organ of the digestive system is the liver, which also is an organic recipient of the emotions, producing enzymes and chemical components jointly with the concomitant actions of the psyche at the moment of the ingestion, deriving also, the useful intelligence codes for the whole body. This confirms that the cause that it contains all other in a suffering of the digestive system is of nervous type and therefore mentally [1].

Studies realized in integral medicine have led to the design and production of medical patents [9], [10] that are going to reinforce the restorer action of the liver using a mental stabilizer that helps the liver to recover their electronic memory, spilling a code of intelligence that contains the corresponding code of intelligence of the electronic memory of the liver, being a narrow relation with the digestive system, as for the production of *neuro-peptides* that control some bacterial systems as the *helicobacter*

pilori taken charge of the treatment of lipids and some chemical derivatives of the lipids obtained by the pancreas and liver in the region of the duodenum which changes its helicity when the individual has stress.

Psychological factor are responsible for the expectation of the bad functioning of the pancreas doing a deficient digestion in the many cases. Basing on the principle of mind - body on the conjecture of anything suffering is the loss of healthy conscience of the organ [1], which is an effect of the fragmentation of the mind-body of the one that presents a suffering and of which the registered dispersion is their spectral effect (see the anomalous diagram of string in Fig. 3). It is necessary to apply a medicine to correct the underlying neurosis in the visible effects at organic level, together with a diet adapted with a restorer of type supplement (not vitamin nutrients because there can be presence of sarcomas).

Fig. 1 The corresponding anomalous string graph [2]

The action of applied integral medicine might have to be one that is anticipated to the negative actions in the digestive system, produce the somas that realized actions on the thin intestine at a level mind - body, inside the specific region of the pancreas. Then the action of integral medicine that would be applied is:

$$\text{Corrector} + \text{restoring} = \text{Bervul} + [\text{Nutrali-9} + \text{mineral salts}], \quad (1)$$

where the supplement *Nutrali - 9 + mineral salts* [3], will correct the subjacent energy in the pancreatic-duodenal zone, whose charges have been reversed the polarity of bacterial groups of the intestinal flora (like the *helicobacter pilori*). By doing that aggressors turn these reagents of protective type, alter the *pH* of the patient. This mechanism is the promoter to the carcinogenic cells. The restorer in this case must contain an opposite helicity to the anomalous one in these bacterial agents, reorganizing their electronic field code. Nevertheless the anticipatory action of *Bervul*, on having corrected pancreatic fabric, the elimination of the gastric infections and gastric pains that were making alike the symptoms as others infections like diarrhea, they make possible the reversion of the sarcoma, which, on not having degraded products of a pancreas regenerated by *Bervul*, not capable of gestating anomalous cells, clearly, submitting also the patient inside this treatment, to the systems of feeding adapted in schedules and light nutrients that promote the helicity initiated for *Nutrali-9 + mineral salt* in the *helicobacter* of the intestinal flora. Nevertheless, the observation of the nervousness system of many patients that presents irritability and neurasthenia, it becomes necessary the application of a mono-pharmacist of integral medicine that was correcting the nervous disorder of the patient, which collaborates for the anomalous state of the duodenum. In fact in a study on the route continued for the gestation of the duodenal anomaly in a patient with these emotional

characteristics, one concludes that the disorder in his duodenum is stemming from the loss of healthy memory of his liver and pancreas (loss of their normal functions), to assimilate the necessary nutrients and the elimination of the unnecessary substances for his body *B*.

To their total cure, it requires the application of a mono-pharmacist of integral medicine with deep corrective defined in (1), and with the action of electronic memory emptied 011110101101011101011110, [1], [2] (binary code obtained by the mono-pharmacist *Gelsemium* Γ2006, of their corresponding transition graph \mathcal{G} , [1]), which it was sick to their mind-body their healthy psycho-somatic state, simulating the action of *Gelsem* in their organic similar [7], (that is to say, in the liver).

It is invite to the patient to realize some practices with cold water, like baths of seat, and establish adequate horary to eat healthy food (full in fibre, avoiding irritants and fat animals). To the respect in last point, also it is necessary for the application of the corrective action given by *Ignamara* + *restoring*, since it is necessary to correct the function of metabolic cell, such as some bacterial groups of the intestinal flora. The questions were: Which is the order of application of these integral medicines? Will these be able to be applied at the same time or with alternation of the integral medicines? An analysis of cause-effect and the diagnostic route are observed in the diagnosis device used to a patient, which makes to conclude:

$$e_{\text{Neurosis}} \supset e_{\text{liver}} = \text{pancreas} \supset e_{\text{Duodenum}} \quad (2)$$

Really the effective energy (\rightarrow “out” \rightarrow “in” value of energy used in the process of action of restoration by half-contours) comes given for [1], [2]:

$$E = \alpha E^0 + \Delta E - \rightarrow \quad (3)$$

where $\rightarrow = i/2\Gamma(\gamma) = 1/2$, [1], [2] is the effective energy value necessary to reverse the increase of soupiest sarcoma in *B* (possibility). The conclusion of this case is no possible existence of sarcomas and the *apparent infection of digestive system* is an altered state in the conscientious level of the mind-body. The diagram of strings includes the diagram of strings given by *Bervul* + *Ignamara* [7] (Fig. 4).

Fig. 4 The code given include the codes of change of polarity, where these are recovered by the restorer [7]-[11], given for *Change polarity* = *Nutrali9* + *Mineral salts*, the which are the *specific mineral salts* [7]-[11], of the immunity system to this case. The code 101101, is more short but with equal action that the intelligence code given by *Gelsemium* (the line shortest in path is given by $\square - - - \bullet$ [1]-[12]). So only this last stay include in the action of restoration of liver of the patient given by the code which have twelve digits of the deep action 0111101011011011011011110

IV. HEALTH INDUCTIONS OF THE D_{12} -MONO-PHARMACISTS ACTIONS TO MENTAL SYMPTOMS

In some medical procedures of homeopathic level, the combination of quantum factors is realized by a lot of successes for the prevention of concomitant illnesses. Such is the case of the *immune-modulators* [7], which through a combination of D_{12} - groups of mono-pharmacists realizes an elimination of concomitant factors and is an assistant for the medication of the immunological system.

The immunological system depends on the anticipative power that has the organism of the body for the recognition of the metabolic functions for the prevention of illnesses, which is in the psyche of the organism, which as we have mentioned is governed by the mind on the body, creating the healthy quantum states in the space-time of the mind-body [13].

When the creation of the quantum states is not realized satisfactorily (for absence of a suitable recognition of the real psychic situations), these crowd (superpose), producing bundles of energy caught by the mechanisms of resistance of the conscious and pre-conscious one, (having an emotional weight) producing the conflict between the conscious and the unconscious [14]. Then a psychological symptom appears.

Many of the illnesses (of fact, all the illness) are caused by the appearance of a psychological symptom, which appears by the absence of a rational conciliation between the parts \mathcal{R} , and affective \mathcal{E} , of the mind \mathcal{M} [14].

Nevertheless, the actions of certain D_{12} -mono-pharmacists can be induced for the entire remedy (total cure) of mental illnesses and the prevention of appearance of psychological symptoms are an origin of many illnesses of organic type, for example, the cancer appearance is in much for causes of rancor and continuous bitterness, the anxiety in continuous and supported form produces diabetes, etc. Recent modern studies of the theory of the soma confirm these cases [5].

Using the Table III and the transformation law of a symptom is given for:

$$\begin{aligned} *(s) &= \int_{x(c)} O_c(x(t))w(s,t)dt = \\ &= (E^+ - E^-) \sqrt{\frac{m}{2\pi i n}} \int_{-\infty}^{\infty} \left\{ \int_c e^{\frac{im(x-x')^2}{2\pi}} \hat{U}_0(s,t) dx \right\} dt, [15] \quad (4) \end{aligned}$$

TABLE III THE CASE WHEN $\mathcal{R} > \mathcal{E}$, NOT EXISTS PSYCHOLOGICALLY, SINCE THERE CANNOT BE LACKING IN CEREBRAL ACTIVITY IN A LIVING PERSON WITHOUT AT LEAST A CASE OF ORIGINAL CONSCIENCE, THE CASE $\mathcal{R} = 0$, ONLY EXIST IN CLINICAL CASES WHEN THERE IS CEREBRAL DEATH OR COMA, THE CONSCIENCE IS GIVEN BY $O_c = 0$

Quantum Relations in the Space-Time of the Mind			Symptoms
Relations between \mathcal{E} , and \mathcal{R}	Harmonic Propagator	Space-Time	Psychological Symptoms
Disconnection or Discordance between \mathcal{E} , and \mathcal{R} (Never It is Find)	Theta-waves (Vanishing of Alpha-waves)	$\mathcal{E} \cap \mathcal{R} = \emptyset$	All Type

Madness $\mathcal{E} > \mathcal{R}$	Theta-waves and Delta-waves (for example, Schizophrenia) Beta-waves in Different Intensity or Potency	$\mathcal{E} \supset \mathcal{R}$	Emotive Sickness, Phobias, Psychosis, Schizophrenia Certain Grade of Fanatics, Psychopathologies of Loving life
$\mathcal{R} \neq 0$ ($\mathcal{E} = 0$)	Only of Beta and Theta-waves	\mathcal{R}	Psychopaths, Serial Killers

We can establish three fundamental treatments of the mind by the weight $w(t, s)$, and their evolution (that is to say, the emotional content of the symptom that prevents the intelligence \mathfrak{I} , given by (6), is to arrange thoughts in memory (in such circumstances, the memories overlap, without them having a normal order):

- A treatment of integral medicine that balances and arranges the affections (the individual recovers the calmness).

- A treatment that strengthens the will (the individual recovers the force of his own one \mathfrak{I} (will)). In this point there are eliminated all the addictive predispositions, which have debilitated the will of the individual. The individual can recover of symptoms schizoids or of multiple personalities. It eliminates the irrational fanaticism.

- Finally a treatment that promotes the early recognition of the object or psychic situation that appears (that is to say, it realizes recognition purely rationally before the affective part acts producing distortions in the unconscious one). The mind becomes objective and not subjective. The space - time is robust and is not propitious at the symptoms entry.

Likewise, these fundamental treatments can be applied by Table IV of mono-pharmacists of integral medicine belonging to the group D_{12} , of the *Gelsesium* [7]:

TABLE IV MONOPHARMACISTS OF INTEGRAL MEDICINE AND FUNDAMENTAL CURES

#	D_{12}-Monopharmacists		
	D_{12}- Mono-Pharmacists	Correction Action	Fundamental Treatment
1	Gelsem	Mielinized Fabric, Migraines, Fabric Glial, Depression	Emotively Cure, Devolve Calmness
2	Ignamara	Distresses, Serotonin	It Strengthens Will, Inhibition of the Anger, the Inhibition of the Aggression, Good Mood
3	Medigin	Elimination of Toxins That Not Permits A Clear Thought	Clearly, Good Perception
4	Pulsani	Histamines	Anticipated Recognition, Correct Possible Neurologic Degenerations That Cans Derive in Madness

V. ADDITIONAL PROPERTIES IN THE PROGRAMMING ANALYSIS OF PATH INTEGRALS TO QUANTUM CURE OF THE MIND BODY

The following properties are added to the already considered ones in [1]. These are applicable in the cognitive exchange of perception of the mind and its relation with the rational and affective parts of the mind. Also we consider the dual space of the string graphs corresponding to the *cyber-quantum logic* $Q_{1,0}$.

A. Elimination of the Displacement of Objects for Denial (They do not Conceal it or Protect)

i. $u(1) = \delta(1) + u(0)$, with the definition to $u(1)$, see Fig. 5, while

$$u(1) = \begin{cases} 0, & \text{if is not there particle (only wave)} \\ 1, & \text{if is there particle, (only particle } \forall t) \end{cases}, \quad (5)$$

Fig. 5 Displacement of objects to alleviate the emotional lead for incapacity from the part of the intelligence of the mind

The corresponding graphs are the deduced in an integral topology given by [12]-[15].

ii. Elimination the existence of weight of emotional contents for fear (they do not evade it, if they recognize it):

$$\phi(1)\delta(1-0) = \phi(0) = 0, (\text{Not Recognize}) \quad (6)$$

$$\phi(1)\delta(0-1) = \phi(1) = 1, (\text{Recognize}) \quad (7)$$

In the first identity, does not recognize the presence of symptom since in this part their state is a photon or wave (*undetectable*). In the second identity, it is a question of a particle, the electron (*detectable*).

iii. Elimination of the change of sign (polarity) that retract and fold over the symptom (do not feed it or consent):

Postulate. “The proliferation of the states wants to be avoided positron states, that is to say the states of the form $\phi(-1)$, (the electronic antiparticles states to avoid dispersion) cannot be more than the electronic states $\phi(1)$, and $\phi(0)$ ”

iv. Elimination of the states of negative conciliation of the symptom (they do not carry it): Let (-1) , a *antiparticle state* of the electron (positron). Then it haves the laws of parity:

$$\phi(-1) = \begin{cases} -\phi(1), & \text{if } \phi \text{ is odd} \\ \phi(1), & \text{if } \phi \text{ is pair,} \end{cases} \quad (8)$$

with the properties:

$$\phi(-1) = -\phi(-1) : \bullet \leftarrow \circ, \quad (9)$$

and

$$\phi(-1) = \phi(1) : \bullet \leftarrow \bullet = \bullet \leftarrow \circ + \circ \rightarrow \bullet, \quad (10)$$

Remember that the -1 -lines [1] are contours then if ϕ , is pair it is had:

$$\rightarrow \bullet \rightarrow = \curvearrowright + \leftarrow \curvearrowleft \uparrow t \quad (11)$$

If $\phi(-1)$ is odd then $\phi(-1) + \phi(1) = 0$, and if $\phi(-1)$ is pair, then $\phi(-1) + \phi(1) = 1$.

B. Conscientious Level (Fundamental Relation between Inhibition-Impulse)

a) $w(s, t)\phi(-1) \leq \phi(1)U_0(s, t)$ (the inhibition given by a weight and move back is minor than or equal to the state of energy move up and it evolves always for forward with $t \geq s$).

b) Emotional lead:

1. If $\phi(-1)$ is odd, then $\phi(-1)\delta(1) = -\phi(1)[u(1) - u(0)] = -\phi(1)\delta(1)$.

2. If $\phi(-1)$ is pair, then $\phi(1)\delta(1) = \phi(0)\delta(1)$.

v. In the space-time \mathcal{M} , to quantum level, the following table III, is the table of records or memories with present experiences with anticipate value due to psychological perturbation (Table V)

TABLE V THE PAST AND FUTURE IN THE QUANTUM SCATTERING PHENOMENA [15]

	Particle, String and $\phi(1)$	Anti-Particle, String and $\phi(-1)$
Input	$\phi(1) \bullet \rightarrow \circ$ Positive Future	$-\phi(1) \bullet \leftarrow \circ$ Negative Future
Output	$\phi(1) \circ \rightarrow \bullet$ Positive Past	$-\phi(1) \circ \leftarrow \bullet$ Negative Past

Def. 1 A psychological perturbation is a process of scattering risked by the particle with negative potential effect of energy (Fig. 6).

Fig. 6 a) The energy in this Feynman diagram is the given by $E_{\text{output}} = W^- = -E$, (negative boson in the field $b_{\mu\nu}^a$ of mind (see the Theorem (1)). Then

their path integral to output energy is: $I^{\alpha\beta} = \int_C 0_{(1)} \phi = -1$. b) Cube of the net of the mental field X of the mind M . This is the 3-dimensional cube to arrangements in 000-box [15]

Proposition V. 1 Let only four causes to a psychological perturbation that creates a symptom: annoyance, fear, fault and sadness. The *mono-pharmacist group of Gelsem*, can prepare to the mind against these causes.

Proof. First is proving the only existence of four causes of a symptom. After to prove that the effect given by the group $D_{1,2}$, in the anti-symmetric tensor $b_{\mu\nu}^a$, (in the field of the mind) [16], [17], it does not leave any space to the mentioned causes of a symptom.

The annoyance, fear, fault, and sadness are emotional loads that create altered states in the conscientious state $O_c(x(s))$, as was established in the theorem given in [1]. It is only necessary consider the mind like an arrangement of indistinguishable particles with two fundamental quantum states with spins 1, and 0, is to say of bosons type [18], where not exist limit to the number of particles that they occupy in the arrangements. Then we could have in general that

Binary Codes: ... 1 0 0 | 0 1 | 1 1 0 1 | 1 | 0 1 0 | 0 | | 1 1 | 1 | 0 1 0 ...
Bosonic Distribution: ... • • • | • • • • • | • • • • • | • • • • • | • • • • •
Number of Partides: ... 2 4 1 3 1 0 2 1 ...

If consider the net of cubes that conform the mental field X , of \mathcal{M} , we can consider the arrangements in 000-boxes calculated in these cubes [19] (must be of this manner since the material particles in this interaction are anchored to the brain \mathcal{C} (see Fig. 6)). Consider the formula that computes the total number of distinguishable arrangements of the n_i , particles (in the interaction and interchange of thoughts in the mind the unique particles that acts in the process of thought are: electron, anti-electron (positron), photon) with $n(\phi_i)$, states with spins 1, and 0, in only one 000-box [20]:

$$\# \text{ Causes} = \frac{(n_i + n(\phi_i) - 1)!}{n_i!(n(\phi_i) - 1)!} = \frac{(3 + 2 - 1)!}{3!(2 - 1)!} = 4, \quad (12)$$

This cause is transmitted from cube to cube, in the space-time of the mind proliferating the mental sickness (Table III). The calculation becomes more complicated considering all the cubes. By the Theorem 1, [3], Postulate 4, with additional properties given by IV), and the classification given in the Table 1, the four causes are the established by our statement.

In the *boson field* like the given in the mind [18], the transitory of the thoughts pass without alteration in their electromagnetic composition, since an equilibrium exists between the equality of absorption-emission of radiation that is reached in the equalization of the levels of absorption and emission [20]. The existence of Bosons does not permit vanishing states for scattering states (*principle of Bose-Einstein distribution*). As the four causes of symptom are due, the existence of scattering states then the establishment of a *boson field* that controls the quantum mind is necessary (see the Fig. 7). For other side, *Gelsem* determined by two strings [1] conforms to the absorption-emission process

of free electrons

2.5

Encoding of free electron states (Bose-Einstein distribution)

characteristics and that could be dosed and controlled containing the actions of all and every one of the mono-pharmacists of integral medicine.

This mono-pharmacists integration seems natural of happening due to the inclusion of the quantum codes of intelligence of all the mono-medicines in a few mono-medicines of integral medicine. The new mono-pharmacists like the mentioned in the Tables II, and IV, demonstrates the fact that, the new obtained quantum products have quantum factors with major potency and effectiveness including the actions of the others mono-pharmacists (as was showed in the example given in the Title III, and in the clinical case explained) and are less numerous.

Finally propose a device of research process of the brain, based on the results enunciated in the theory of the symptom and using the corollary and all properties of the title IV, grasp also the logic algebra $\mathcal{M}_{0,1}$ [15]. This apparatus that we call *BOSONSHAPE* (*boson topography*) use the principles of the Higgs spectra and the quantum interaction between particles and anti-particles to analyse the changes in the neuron-metabolism during the cerebral activity. The particles deteriorate some others producing detectable dispersion [15], [18], [20] (see Figs. 8, 9). This activity is measured by implication the presence of a psychic symptom or psychic anomalous activity, which must be eliminated strengthening the quantum mind, across a correct bosons bundle whose radiative field [1], let the mono-pharmacists given in integral medicine [1].

Fig. 8 Using one microscopic cybernetic net (space-like $H^1(A, B)$) isomorphic to the cyber-quantum net (space-like $H^2(A, B)$) given with the nano-cubes [19]-[21], like in the Fig. 6 b), we can detect certain brain activities through electromagnetic scattering. Using *Bellatrop* like modulator, we can analyze the mental corrective actions in each *micro-control* or cellular micro-circuits [15], in the different zones of the brain. Remember that all actions of the Brain are connected with the emotional and perception of the world

Fig. 9 The mono-pharmacist series to psychological sufferings belonging to the Group D12, of integral medicine [1], [25]. The four mono-pharmacist eliminates the four fundamental causes of all mental illness (other conjecture). Pulsani corresponds to second scheme in the space-time established by the anticipated recognition given by cosmogonist perception.

The integral medicine is the medicine of the future, which integrates, on the one hand, the holistic medicines [23]; on the other hand, it tries to generalize the types of homeopathic and herbalist medicines through the active substances extracted under quantum processes (*it extracts only their energy*). In the latter point, the so-called quantum medicine is a synonymous one of the integral medicine, as for that the processes of medication and cure are on the handling of the energy of the body, the reconstitution of their field and the restoration of the whole organism from the atomic level [3].

As it has been said in previous researches [2], [3], there is only one cause of any illness that is the atomic collateral damage.

ACKNOWLEDGMENT

We are grateful to the National Autonomous University of Mexico (UNAM) Medical Office, Homeopathic and Alternative Medical Center “*Trading Kéter*”, and the Department of Research in Mathematics and Engineering, Technological Institute of High Studies of Chalco (TESCHA) for the support during the writing of this manuscript.

TECHNICAL NOTATION AND UNITS

B	Part of system of the human body
<i>B</i>	all human body
$H^1(A, B)$	space of similarity relations on first duality
	effective energy that spilled an action (+/-1/2)
	effective energy that reverted an action
$(-/+1/2)$	
ΔE	incremental effective energy
$x(s)$	water exchange rate
e_{Neurosis}	neurosis effect
e_{Liver}	Liver effect
e_{Duodenum}	neurosis effect
X	Vital field
\mathfrak{Z}	Action of field
$X(B)$	Image of the Field on one part of the body
$H^2(A, B)$	space of similarity relations on second duality
TB^\pm	vector bundle of ionic interchange of the field
	string diagrams used to represent binary codes
\mathcal{G}	transition graph
$\ast(s)$	anomalous code (symptom) = cause of illness
M	effectiveness in the space-time of mind/body
E^l	effectiveness/path walked approximate value
R^a	continuum quantum factor (Newman factor)
$O_c(x(s))$	conscience state to the thought $x(s)$
M	mind
n_{e-}	free electron densities
nm	nanometers
V	microvolts

Francisco Bulnes is mathematician and Doctor in Mathematical Sciences from UNAM. He has a post-doctorate in infinite Lie theory and their applications in Informatics and quantum electrodynamics in Cuba. He is full member of the ANS (American Nano Society). He authored many specialist books: conference compilations, advanced treatise of mathematics for scientists and engineers, technical monographs and mathematical specialist monographs. All with ISBN and published for many universities in and out from Mexico. The author also published many mathematical papers in international journals. He was a co-Principal of the doctoral seminar of Lie groups in Institute of Mathematics-UNAM, and badges, fellowships and other distinctions in the doctoral seminar of research, principal of the Department of Research in Mathematics and Engineering, TESCHA, and he is researching on total digital of production and distribution energy plants, on the classification problem of irreducible unitary representations and on one new theory of the universe with MIT and Harvard groups. Is president of GI (Research Group).

Francisco H. Bulnes, Sr., (1934-2009) Medical Surgeon from UNAM. He was MPH (Master of Public Health) by Public Health School of Mexico. Also, he had a Master of Epidemiology by UCLA, USA. From 1972 to 1977, he was commissioned by (WHO) World Health Organization, where he did many studies on health in east Europe and South America. Principal of CENIDSP (Information Center to Decisions in Public Health) (1976-1978). He was in many seminars in MEDLABS and Bethesda University (Department of Medical Research) in USA. Author of many articles in medical reviews of WHO. French Translator of many medical magazines. From 1981 to 1995, he was principal of Epidemiology Department of IMSS (Mexican Institute of Social Security). In all moment he had a medical office where cured many people using homeopathic and quantum medicines methods. He received many fellowships from UNESCO, and WHO, since he did a specialization in pediatric. He was considered a great medical surgeon in the community and leaved a legacy of useful clinical cases consigned in medical consultations and health process of his patients.
